

Work Package 4

Finding out what helps people with learning disabilities and their families to make a plan for the future

EASY READ

Many people with learning disabilities live at home with their Mum and Dad.

We want to find out what happens when Mum and Dad get too old, or die. Where will people live then?

To do this we will meet with people with learning disabilities and their families, and ask them.

We will meet people on their own or in a group.

Because of lockdown, we will also meet with some people on video.

We will make a film about people's experiences.

Together, we will make a plan for helping people with learning disabilities and families.

We will try out the plan with some families.

We will write a report about what we find out.

We will write Easy Read summaries of what we find out.

We will tell people about it what we find out.

You can read more about the big project on this link:
